Commercial Advertiser.

SATURDAY, JUNE 30.

NOTES OF THE WEEK.

FIRE WORKSMANSHIP.—Mr. John Costa, jeweler
and silversmith, has shown us the plate made by
him for the coffin of the late Princess Victoria.
The whole work was executed by himself, even to
the casting of the plate, which is of pure silver,
made from American half dollars. It consists of a
shield, with the following inscription in Hawaiian:
By Royal Richness the Princess
Victoria KAHAMAE KAHAMAE,
Born on the 1st day of November, A. D. 1858,
Died on the 22nd day of May, A. D. 1866,
Aged 27 years, 6 mos. and 25 days.

Surmounting the shield is a silver crown, and
below the shield a scroll, encircling the national
motto, "Righteousness is the strength of the land."
The shield are also the crown and scroll, is
surrounded with frosted ornamental work in relief.
It was the artist's design to gild the relief
work, but the King prefers to have it plain.

—The coffin, which has been lying during the
past week in Mr. Fischer's shop, is an elegant work
of art. It is made after the pattern of that of the
late King, out of oak and knot woods, than which
there are no richer cabinet materials to be found.
The whole, coffin and plate, as now in the palace,
is a specimen of handicraft that could not be ex-
celled in any other country, with the same expen-
diture, and we congratulate the public on having
artisans resident among us capable of producing
such work, though we trust it will be a long time
before they are called on to show their skill in a
like undertaking.

KOOLAU.—Our reporter, in company with a keen
observer, and a lover of rural beauty, made a fly-
ing trip a few days since to the windward side of
this island, and through the Koolau districts, repre-
sented in the Assembly by the irrepressible Ukeke.
The country looked green and charming; every-
where mountains, valleys, and plains were clothed
in their richest velvet robes, inspiring his muse to
sing with a poet, whose name he cannot recall.

"Fair Summer! Thy gentle reign is here,
Thy emerald robes on every leaf are seen."
All the can-fishers are looking remarkably well,
and the cane as thickly and fresh as the owners them-
selves, promising an abundant harvest of sweets.
Last Sunday was quite an eventful day in Koolau,
as one birth, one marriage, two deaths and two
funerals occurred, furnishing scenes of joy and
mourning, as well as texts for preachers, and items
for the altar, the cradle and the tomb. He says he
will not be surprised to see a day party started
soon in that district, which furnishes more petitions
to the Legislature, suggests more extraordinary
laws, and asks for more money appropriations than
all the rest of the island put together.

THE NEWSPAPER.—Take the most thorough man
of the world of your acquaintance, says Lord
Brougham—the man most perfectly versed in what
goes on in all conditions and ranks of life—and I
ask you what would he be without his newspaper?
By what possible machinery could he learn, as he
sits at his breakfast, the last news from China, or
the last battle at Paris, the state of the funds at
San Francisco, the winner at Newmarket, the
Pantomime of the Olympic, and the encyclical of
the Pope?

Without my newspaper, life would narrow itself
to the small limits of my personal experience and
humanity be compressed to the ten or fifteen people
I meet with.

As for the advertisements, I regard them as the
mirror of the age. Show me but one page of the
"wants" of any country, and I engage myself to
give a sketch of the current civilization of the
period. What glimpses of rose interiors do we
gain by those brief paragraphs. How full of sug-
gestions they are.

JULY 4th.—The anniversary of American Inde-
pendence occurs on Wednesday next. As yet no hear-
ing has been done to prepare for it, that we can not
of, owing probably to the circumstance of the Princess'
death and funeral. But now that the obsequies
are over, there can be no harm in preparing for
the day in a becoming manner, not by any extran-
eant display or expenditure, but in a quiet socia-
ble way. A national salute should be fired, and a
place selected for a picnic gathering for such ladies
and children as may choose to unite in celebrating
the day. Waikiki Grove or Punahoa College
grounds can be had for the occasion.

Our country girl, our honor and our pride,
Land of our hopes, land where our fathers died,
When in the right, we'll pray thy honor bright,
When in the wrong, we'll die to set it right.

A NOVEL RECREATION.—The pupils of the Waila-
lua Female Seminary wishing to attend the funeral
of the Princess Victoria, started on foot last Mon-
day morning from Wailua, accompanied with their
teachers, purposing to walk into town via
Koolau. Leaving Wailua early on the morning
named, they reached Kaula at noon, and slept at
Hauia that night, at Kaula Tuesday night, at
Wilder's Wednesday night, and at Mr. Parker's
Thursday night, arriving in town yesterday. It
was a novel sight to see so many juveniles engaged
in a pedestrian journey of seventy miles, but the
excursion is calculated to do them more good than
twice that distance in the saddle.

MORE HORSE-BURNING.—There would seem to be
some official servile loose in the administration of
justice on Molokai. Some months ago Mr. Rogers'
house was burned down over his head, and the cul-
prit, though well known, allowed to escape punish-
ment. Recently the house of a native in the same
place was burned, and an attempt made to burn the
dwelling now occupied by Mr. Rogers. A petition
has been sent in to Government praying for the re-
moval of the local judge, who, it is said, winks at
the deeds of these midnight assassins, but as yet no
change has taken place. When persons resort to
house-burning as a means of personal revenge,
hanging is too mild a punishment.

REPORTED LOSS OF SCHOONER.—By the schooner
Prince, which arrived on Wednesday night from
Hanalei, we have a verbal report that the schooner
Onward, belonging to Messrs. Janion, Green & Co.,
had gone ashore at Wailua, about five miles west
of Koloa. We have no particulars, and trust that
Captain Lambert will be able to get his vessel off
without serious damage. The *Moi Wahine* is due
from Koloa, and ought to bring in a full account of
the accident.

CHOCQUETTE.—We observe that this really pleasant
and somewhat exciting game is quite popular
among young folks as well as older persons, and
on any pleasant afternoon parties may be seen
playing it on the lawns in front of the charming
residences that line Nuuanu valley. It is one of
the best out-door sports that have ever been intro-
duced, and we recommend it to all.

A DISCONTENTED DOWN-CAST EDITOR exclaims
in one of his late issues: "Go to Japan. You can
buy a first class house there for thirty dollars, and
live comfortably in it for two cents a day. Ser-
vants charge fifty cents a month."

REAL ESTATE SALE.—The property belonging to
the estate of the late Levi Haaalelea, advertised for
to-day, is postponed to July 7. This sale embraces
and on all the islands.

WHALING BY STEAM.—We have several times dur-
ing past years advocated whaling by steam, which
is at length about to be put to a practical test,
both from England and the United States. A
steamer fitted out in San Francisco or Honolulu,
at a cost of \$40,000, thence proceeding to Puget
Sound for coals, thence to the Kodiak Sea and the
Aretic Ocean, would stand a fair chance of obtain-
ing more than an ordinary catch. Now some of
our successful whalers bring in cargoes worth from
\$60,000 to \$100,000 taken in one season. We have
great confidence in this mode of carrying on the
business, and believe that in a few years, after a
full trial is given, it will supersede the present use
of sailing vessels. The New Bedford *Mercury* has
the following:

The feasibility of whaling by steam having been thoroughly
tested by the Messrs. Rags Brothers, of New York, three steam-
ers are to leave different parts of England about the 1st of
April next, commencing respectively by Captain W. H. Rags,
S. W. Rags, and A. B. Rags. The steamers sail from England
under the Danish flag, and a few of the crew have been ship-
ped to the port of San Francisco, and will be ready to receive
passengers. In five days' sail the steamers are upon whaling
ground, and the place-hunters are well equipped in every sin-
gle respect. This mode of whaling has been tried by these parties
two seasons with perfect success. The crews are made up prin-
cipally of Danes.

The New London Democrat, of May 5th, de-
scribes the trial trip of a steam whaler, fitted out
by Messrs. Williams & Haven, of that city:

TRIAL TRIP OF THE PRINCE.—Recently the bark *Prince*
made a trial trip. She cast off from the dock about half-past
9 o'clock, and steamed down harbor in gallant style. There
were quite a number of invited guests on board, and they were
all highly pleased with the new steamer. When she got under
way she had but a small quantity of steam, but she moved on
finely, and landed her helm readily. She returned from her
trip short of coal, and was anchored in the harbor. It
was the opinion of all on board that the *Prince* was a de-
cisional vessel. This vessel was originally built for a Govern-
ment transport, and was purchased by the Navy Department
in 1854, and was used for a number of years. She was then
sold to Mr. Williams & Haven, and was fitted up for whaling.
She is a very fast steamer, still, it is thought from the experimental
trip that she will when in good trim make from five to six miles per
hour. We congratulate Messrs. Williams & Haven on the suc-
cess of the new vessel and
